

Environmental Management System Texas A&M International University Environmental Policy

In accordance with our mission of teaching, research, and service, Texas A&M International University (TAMIU) is committed to conducting all of our activities as responsible environmental stewards.

We commit to protecting our assets, respecting the health and safety of our community, maintaining strict accountability for the natural resources entrusted to TAMIU and promoting educational activities that enhance environmental awareness, safety, and action.

The entire TAMIU community is committed to conducting our affairs to best:

- Promote the conservation and maintenance of our natural South Texas cultural resources, with special concern for our TAMIU ecology;
- Encourage the purchase of renewable, reusable, recyclable and recycled materials;
- Minimize the generation of wastes;
- Promote strategies to reuse and recycle;
- Help inform TAMIU community about environmental health and safety issues;
- Inspire environmental research and assessment;
- Support environmentally responsible teaching, research and outreach;
- Provide open communication on environmental issues, with special focus on campus initiatives;
- Encourage the incorporation of environmentally sustainable standards into all strategic planning efforts;
- Advocate careful stewardship of critical water resources in our arid region;
- Enhance awareness and promote applicable local, state, and federal environmental laws and regulations.
