The current pricing guide for Examity is the listed above. Note: Automated Proctoring (Standard and Premium) do not include a proctor. Live Authentication and Live Proctoring (Standard and Premium) are levels with a proctor present for the start of the test OR for the entire duration of the test. See below for descriptions.

Examity Level Descriptions

Live Authentication – \$6.00 (flat fee)

In live authentication, test-takers present their government-issued photo ID, answer one of their challenge questions, and enter their biometric signature. Then the proctor will confirm the exam rules and instruct the test-taker to perform a 360-degree room scan to confirm the workspace is free of any unauthorized materials.

Automated Proctoring – Standard – \$2.75 (flat fee)

It is important to know that automated proctoring always includes auto authentication. This means that before the start of an exam, test-takers will verify their identity by snapping a picture of their government-issued or school photo ID and face, answering a security question and completing a biometric keystroke match.

Following authentication, Examity will capture audio, motion, and systemic changes to identify aberrant behaviors. After the test, timestamped comments along with violation screenshots are available on the instructor dashboard.

Automated Proctoring – Premium – \$7.00 (flat fee)

It is important to know that automated proctoring always includes auto authentication. This means that before the start of an exam, test-takers will verify their identity by snapping a picture of their government-issued or school photo ID and face, answering a security question and completing a biometric keystroke match. Finally, test-takers will be presented with, and must confirm they have reviewed, the exam rules.

Following authentication, Examity will capture audio, motion, and systemic changes to identify aberrant behaviors. After the test, for quality assurance, our auditing team will review the exam recording before releasing the audio, video, and analytics to the instructor dashboard.

Live Proctoring – Standard – \$12.00 (first hour); each additional hour is \$5.00

Live proctoring always includes live authentication. This means that before the start of an exam, test-takers present their government-issued photo ID to a live proctor. Following a review of their ID, test-takers will answer a security question and complete a biometric keystroke match. Then the proctor will confirm the exam rules and instruct test-takers to perform a 360-degree room scan to confirm the workspace is free of any unauthorized materials.

After live authentication is complete, the proctor hits record, and the exam is recorded from start to finish. The exam is proctored, and audited, at a later time. Any suspicious behavior is flagged.

Live Proctoring – Premium – \$15.00 (first hour); each additional hour is \$7.00

Live proctoring always includes live authentication. This means that before the start of an exam, test-takers present their government-issued photo ID to a live proctor. Following a review of their ID, test-takers will answer a security question and complete a biometric keystroke match. Then the proctor will confirm the exam rules and instruct test-takers to perform a 360-degree room scan to confirm the workspace is free of any unauthorized materials.

After live authentication is complete, the proctor will monitor the test from start to finish. The greatest advantage of this solution is the ability for the proctor to interrupt when a possible violation occurs. This solution is recognized as the most secure within the online proctoring industry.
